### **REASONS FOR ALLOWANCE**

The following is the examiner's statement of reasons for allowance:

Renumbered independent claims 1 and 14, among other things, teach a method with a switch having a plurality of processing elements each running a network operating system; creating discrete customized services through customizable configuration of service object groups; a system virtual router on a PE, wherein the virtual router establishes a global object manager being responsible for managing global object groups and global object configurations; and allowing the virtual router to configure a plurality of processing elements, wherein configuring includes establishing, via the global object manager, a local object manager on each of the processing elements, wherein the local object manager manages local objects and transfers messages between objects on and between the processing elements within a network environment.

The prior art does not teach the cited limitation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
